

HOMPYE BAMBOO BOARD

**SOMETHING
SPECIAL!**

**100% BAMBOO
CORE BOARD**

At HOMPYE, we offer a unique and eco-friendly option with **100% bamboo particle board**.

Known for its exceptional strength, superior nail-holding power, and resistance to deformation, this board outperforms standard materials.

It remains stable across various climates, making it ideal for different regions.

With **high moisture resistance**, it is particularly well-suited for high-moisture environments such as bathrooms and kitchens.

Choose bamboo core board for a greener, high-quality alternative in your cabinetry projects.

Melamine Classic Colors

- **Styles:** Flush, Shaker
- **Finish Options:** Melamine, PET
- **Cabinet Door Thickness:** 18mm
- **Edge Banding:** PVC or timber veneer with a matched color

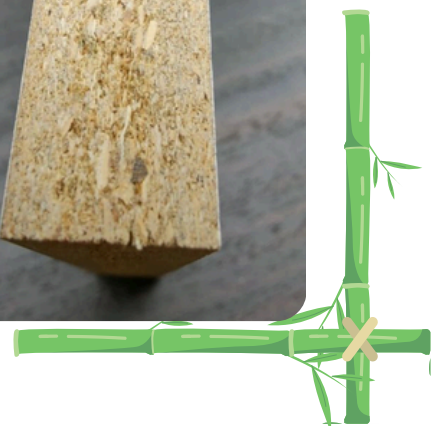

NAF Bamboo Board (No-Added Formaldehyde)

The NAF standard mandates that all products within the same batch have formaldehyde emission levels of **less than or equal to 0.2 mg/L**. This is significantly lower than the E0 standard, which allows up to 0.5 mg/L in the same batch.

NAF boards are the ideal choice for **indoor use**. They ensure a healthier living environment by reducing exposure to harmful chemicals. This makes them perfect for kitchens, bedrooms, and other interior spaces where air quality is crucial.

Our NAF boards offer a safer, healthier option for any cabinetry projects.
