Cabinet and Cupboard Doors

Thickness: 18mm

Core Board

- Eucalyptus plywood
- OSB
- Particle board
- MDF

Solid Wood Options

- Eucalyptus
- New Zealand Pine wood
- Fir Wood

KEY BENEFITS OF PET

1. Flatness & No Delamination:

Processed with high-quality materials and PUR-HOT-MELT adhesive in a non-dust pressing plant for superior flatness and no delamination.

2. Eco-Friendly:

Made from food-grade PET materials, releasing no toxic gases, ensuring an eco-friendly choice.

3. Scratch-Resistance:

Surface hardness level of 2H for excellent scratch resistance.

4. Anti-Yellowing:

Special surface treatment prevents color fading and yellowing, maintaining a fresh look.

5. Consistent Color:

Minimal color variation between batches (E < 0.5) for a uniform appearance.

6. Stable Quality & Resistance:

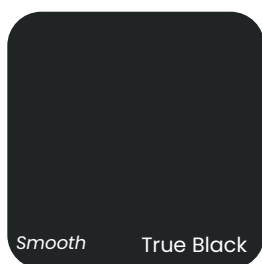

Oil and corrosion-resistant, ensuring durable and stable quality.

High Gloss PET

Smooth PET

PET Smooth Cabinet Doors (Soft Touch) offer a smooth, skin-like texture with high stain resistance and durability, featuring a subtle sheen and realistic wood grain.

PET High Gloss Doors, on the other hand, have a sleek, mirror-like finish with excellent clarity and high shine but may show fingerprints and require careful maintenance. They are both eco-friendly.
