

# HOMPYE MELAMINE CATALOGUE

Hompye's melamine cabinet doors offer an eco-friendly E1 rating, ensuring low formaldehyde emissions. They are durable, resistant to scratches and moisture, and easy to maintain. With a variety of colors and textures, our doors provide consistent quality and a cost-effective alternative to natural wood.

- **Styles:** Flush or Shaker
- **Surface Finish:** Smooth, textured, high gloss PET, UV Coating
- **Thickness:** 18mm Standard
- **Core Board:** Solid Wood, Plywood, MDF, Particle Board, Block Board, OSB
- **Edge Banding:** Timber Veneer or PVC with a matched color

## Curved Panel

At Hompye, we offer various techniques to craft round edging panels, tailored to the specific size of the edges. These panels are ideal for applications such as curved wall corners and curved corner cabinets. Whether you require small, precise edges or larger, more pronounced curves, our skilled craftsmen utilize advanced methods to achieve the perfect finish for your project.

## Fluted Panel

**Fluted panels** feature vertical grooves or ridges that add a textured, decorative element to surfaces.

When paired with plywood, fluted panels enhance the overall design by providing contrast and sophistication.

This combination is ideal for modern interiors and adds an elegant touch to cabinetry and wall applications.
