

# HOMPYE WOOD VENEER

Wood veneer cabinet doors and panels are crafted by applying a thin layer of real wood to a core substrate, such as plywood, MDF, or particle board. This method provides the aesthetic appeal of solid wood while being more cost-effective and sustainable.

**Veneer can be sanded and painted to achieve the desired finish.**

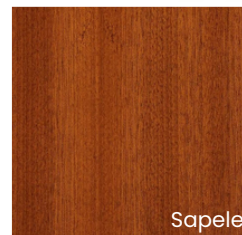

White Oak

Beech

Walnut

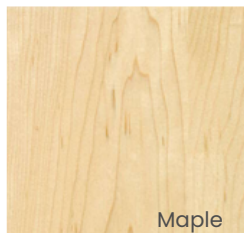

Sapele

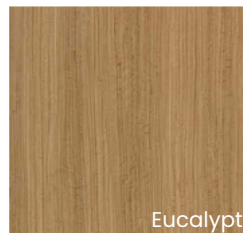

Teak

White Ash

Maple

Eucalypt

Mahogany

Cherry

**\*Keep in mind:** Our wood veneer slices may be **Crown** cut or **Quarter** cut, resulting in different patterns. If you request a specific pattern, please specify your preference. Other wood species may be available upon request.
